

Wedding Day Content Creator

Don't wait to share your love story

This exciting new concept has taken the internet by storm in addition to photographers and videographers; increasingly, couples are now hiring “Wedding Day Content Creators”, allowing them to share their special moments from their wedding on social media right when they happen.

Even if you're phone savvy, if social media is an important element of your life, you may not want to leave the responsibility to yourself and your bridesmaids on your big day. Your content creator will capture all the fun, modern, candid behind-the-scenes moments in real-time, allowing your guests to be fully present in the moment.

For the couple, their wedding day can be a blur. Hiring a content creator means the couple can almost immediately relive their special day. Wake up the following day to hundreds of raw photos & videos that you can edit to your style.

If the price is within your spending limit, it's an excellent addition to your photo and video team - not only to add a professional touch to your social media content but for family and friends who may not have been able to make it to your ceremony.

FAQ's

What do you do?

As a wedding content creator, we capture the behind-the-scenes moments from a guest's perspective allowing your guests to enjoy the moment. Our content is specifically formatted for social media. Our quick turnaround time allows you to relive your special day almost instantly.

Are you an alternative to a photographer/videographer?

As you plan for your special day, you may be considering all the ways to capture and preserve the event. If you have the budget to do so, hiring a photographer, videographer, and content creator could be the best decision you could make.

A content creator should not be viewed as a replacement for professional photographers and videographers - we are an excellent addition to enhance your wedding memories.

I already have a photographer/videographer booked. How does that work?

That's not a problem. We allow the professional teams to get all their content first. We stay behind the cameras at all times until they have finished, and then we can do our thing, given there's time. However, we're still capturing the behind-the-scenes moments throughout the day. We work together with your wedding photographer and videographer to ensure that all angles are covered. You'll have an impressive collection of photos and videos after your special day. We always recommend contacting your photographer/videographer first to let them know you will be booking a content creator to work alongside them on the day.

FAQ's

Who will be my content creator?

Either myself or one of our amazing team members will be there with you to make sure no moment goes uncaptured. Your reels will still be personally edited by me to make sure the end result is exactly what you expect it to be.

What do you get for the half-day package?

The half-day package is 4 hours. We can start from the tail end of getting ready or from ceremony. The 4 hours cannot be split

What do you get for the full-day package?

Below is an example of what you're likely to receive when you book the full-day package. This is subject to change depending on the wedding format and time allowance:

- Getting ready
- First look
- Set-up
- Ceremony
- Couples shoot (with permission from your photographer)
- First dance
- Cutting cake (depending on what time)

Do you record sound?

No, as I add music over the top of my videos.

How long are your videos?

Anything between 10-60 seconds.

FAQ's

How do we book?

I take a €50 non-refundable deposit to secure your date either by Revolut or bank transfer. The remaining balance will be due the morning of the wedding either by bank transfer or cash.

Do you only cover the Paphos area?

No, I travel island-wide, but I charge extra for fuel and time.

Central Paphos: No charge

Liopetro/Base/Vasilias/Anassa: (40 mins): €20

Limassol (1.5hrs): €120

Larnaca (2hrs): €160

East Coast (Protaras/Ayia Napa) (2.5hrs): €200

What do you mean by 'unedited photos and videos'?

Within 24 hours, you will receive all the raw footage taken from the day. This footage is unedited and hasn't been edited in any way. This allows you to edit them yourselves to your own preferred aesthetics. We want to make sure you never miss a moment! That's why we mainly capture your day in short videos. We shoot in 4k, allowing you to screenshot these videos to obtain high-quality images. The photos you see on our profile are all screenshots.

Do you record speeches?

We will record snippets but we will not record the whole speech for a few reasons. It takes up too much memory on an iPhone, the sound quality isn't good and also our clips are taken for the purpose of reels. This is down to your videographer.
